THE GAME FRESH SYSTEM™ by Trophy Bag Kooler™

The Game Fresh System™ includes everything you need to keep meat as fresh as possible from the field to the processor or taxidermist. The Game Fresh Spray™ is an antimicrobial spray, that when applied to dressed and cleaned meat, helps disinfect and control the growth of bacteria and microorganisms on wild game or raw meat. Our specially formulated KoolerGel™ is re-usable and stays colder longer than conventional ice.

The Trophy Bag Kooler™ has the durability to last for years. And best of all, it is made right here in the USA! For the best solution to transporting game from the field to the processor or taxidermists, make it The Game Fresh System™ by Trophy Bag Kooler, the first step to great tasting meat! The Game Fresh System™ includes: One Trophy Bag Kooler™ in choice of pattern, one six-pack of KoolerGel™, and one 8-oz bottle of The Game Fresh Spray™.

Pattern Choices for Bags

Item# TBK3MB

Trophy Bag Kooler™ in Realtree AP HD®
Large bag holds up to 300 pounds

Item# TBK1RA

Brad Lockwood

Producer Love of The Hunt TV Show & Award Winning Processor!

"My wife killed a nice 9pt last Monday, I skinned the deer and let it hang overnight to chill. The next day a friend from Colorado who was here hunting with me killed a nice 8pt so I took my wife's deer down from the gambrel and placed it in the bag. I left it in the bag for 7 days!! When I opened the bag and cut the deer there was not one inch of dark or dried out meat!! Seven days with ZERO waste! The meat was perfect! Nice and tender, well aged. At night the outside temperature dropped below freezing and ponds even froze over with a little ice. The deer never froze! I drug the bag with the deer in it up onto my front deck and opened the bag and removed one quarter at a time and brought it into my processing area and then deboned the rib cage while it was in the bag!

You have an awesome product, Mr. Glass, Simply AWESOME!!" Brad Lockwood, Producer, Love of The Hunt TV Show

Why do Hunters Need a Trophy Bag Kooler™?

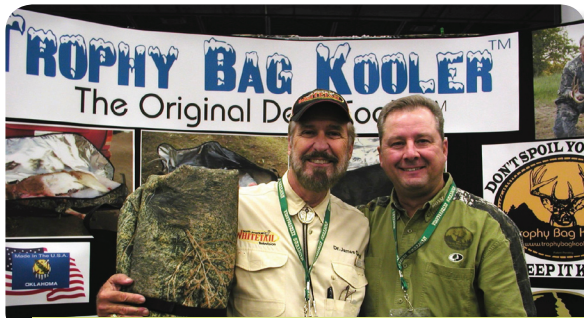

- Keeping Your Harvest Cool is Paramount for Preventing Spoilage
- Uniquely Designed Short-term Portable Storage Unit
- Antimicrobial Liner Prevents Mold, Mildew, and Growth of Bacteria
- Durable, Water Resistant Polyester Outer Shell
- Dual Purpose Antler Flaps
- Draw String Leg Holes with Slide Locks
- Cleaner, Neater Transport of Harvested Game
- Helps Eliminate Bugs and Flies
- The Trophy Bag Kooler™ can Maintain Temperatures of 36° to 40° of a Harvested Animal when used along with KoolerGel™
- Easy Clean-up with Soap and Water

Have you ever wondered why meat tastes gamey?

It's a direct result of poor handling in the field. Once an animal is down deterioration starts immediately. At:

- 32° it takes 20 hours for bacteria to double
- 40° it takes 6 hours
- 60° it takes 2 hours
- 70° it takes 1 hour
- 90° it takes 30 minutes
- At 98.6° one bacterium in an enclosed environment over a six hour period will multiply to 131,072 bacteria

For Deer, Hog, Turkey, Bear, Fish...You Name It!

"The Trophy Bag Kooler™ is the Product of the Year! A must have for every hunter"...Dr. James Kroll, "Dr. Deer"

The Game Fresh System™ and The Trophy Bag Kooler™

can be used for all types of harvested game animals, not just for deer. We've had hogs, turkeys, antelope, bear and even fish in the Trophy Bag Kooler™. It also comes in a Quarter Bag model, a Trophy Bag Kooler™ without leg holes, that is perfect for larger game, such as elk, that can be quartered and placed in the bag for transport or aging.

Steve Glass

Inventor of *The Trophy Bag Kooler™* and *The Game Fresh System™*

"I love my Trophy Bag Kooler. This is a must have item for every home processor. It's like having your own portable deer sized meat locker to quickly cool, transport and age game. The TBK ensures I have delicious, fresh tasting venison every time, it goes with me on every hunt"

**David Bloch, President Outdoor Edge,
Co-host of Love the Hunt TV**
